

## Welcome to Class 1

Class one is made up of KS2 pupils. We work in a range of ways including independent, whole class, group and paired learning. During lesson time the children sit at their tables to receive the whole class input, discussions and sharing of knowledge. We have individual work stations in the classroom that some pupils opt to sit at for independent and focussed tasks with the minimal distractions. All resources and equipment are made accessible to the pupils in labelled drawer units.

On a daily basis the visual timetable is set up and discussed during meeting time for that day's lessons and enrichments. During this time the pupils can raise any questions or anxieties that they might have and school expectations can be set. Using the focus of the week we can identify important expectations and aim to reach them by the end of the week. At the end of the day there is also time dedicated to the review of the day, covering how the day has gone and successes are rewarded through the house point system.

In Class one, we have five lessons a day and these are mostly taught by the class teacher. Mrs Bowyer is in class two lessons a week and Mr Price will be teaching all Science lessons. We also have one life skills lesson a week, which is led by Mrs Calver.

We have both Maths and English 4 times a week and Geography, History, Science, Art, D&T, PE, PSHE and ICT lessons are shared throughout the week. The pupils in Class one are supported by teachers, learning and support assistants, an occupational therapist and speech and language therapists.

The individual needs of our pupils are met through lessons and individualised intervention programmes. Interventions are designed to develop pupil's reading, writing, speaking and listening, maths and social skills.
