

## **Ingredients/Equipment**

### **Class 6**

The GCSE food exam consists of a non-exam assessment known as the NEA task. These tasks are released in September and are designed to help develop students understanding of the working characteristics, functional and chemical properties of ingredients. Tasks undertaken in school will therefore consist of experiments and recoding the results of these. Students will then work towards a food preparation assessment. Students will prepare, cook and present a final menu of three dishes within a three hour period. Throughout the year students will work on developing their skills knowledge and understanding of planning, preparing, cooking and presenting food. If ingredients are required for year 11 notice will be given
